

# GOOSENECK CABINET PULLS

**The Gooseneck cabinet pull was designed by Christina Roberts and is another creation with the classic curved neck.**

The sibling product to the Gooseneck door lever and door pulls add another element to the collection. The design adds a level of sophistication and finesse to the traditional gooseneck range. The collection is available with the same grip designs as Turnstyle Designs “Combination” ranges. Available in solid brass, leather or composite materials, offering a huge choice of over eighteen different grip designs. As well as standard lengths we also offer a bespoke sizing as part of our Made to Measure service, where you can request custom lengths up to 2 meters.
