

STACKED CABINET KNOBS

The Stacked cabinet knob was designed by Christina Roberts and is available in all of Turnstyle's best-selling Solid, Leather and Amalfine™ designs and finishes.

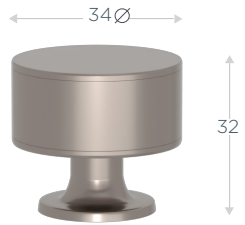

The Stacked Cabinet Knob comes in six designs; Labyrinth, Woven, Wire, Faceted, Shagreen and Barrel, as well as material finishes of leather, solid brass and the stunning hammered brass. The creation consists of bold designs, stacked between two slim layers of brass and set on a contemporary rose. Door knobs in the same finishes are also available to co-ordinate with the cabinet knobs.

Each of the designs are available in over 54 combinations of materials and finishes, allowing for the perfect fit within an interior design.
