

STEPPED RANGE

Derived from the Step Labyrinth design, launched in 2019 in collaboration with Winch Design Turnstyle Designs new range of door levers are a scaled down version of the stepped brass work, combined with some of their best-selling grip designs.

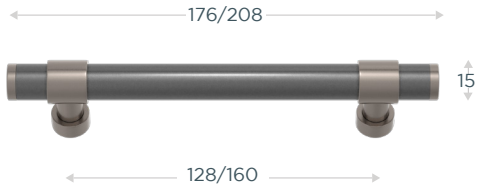

The contemporary over hang grip design, with stepped shaft has been so popular with Turnstyle clients that they have decided to extend the range extensively. The new door lever grip is scaled down overall with a 22mm diameter, set on a very elegant new "flat" rose and is available in Leather, Solid and Hammered brass as well as some Amalfine™ designs, Wire, Woven, Shagreen and Barrel.

The range is being extended to all the above designs in door levers, door pulls and Cabinet D handles. Multiply the eight new developments across the 54 combinations of finishes per design and you can soon work out that Turnstyle have added a choice of over 400 new door combination options per product type.
